

Accounting

Why Accounting?

Accounting is a field that offers challenging and meaningful work as well as good working conditions and a rewarding salary.

The Accounting curriculum is continually modified and updated to keep pace with ever-changing rules, laws and technology. The program focuses on providing the student with the accounting skills needed for the job, as well as the analytical skills needed to evaluate situations and look at the “big picture.” The degree provides a foundation in economics, law, management, finance and computer technology.

Program Outcomes

Students who graduate from this program will:

- Have a working knowledge of financial and managerial accounting
- Know how to operate at least one accounting software program
- Know how to prepare a complex individual tax return
- Be able to prepare accurate and well-organized financial statements
- Have the ability to make the adjustments needed to create financial statements in accordance with generally accepted accounting principles
- Demonstrate proficiency in analytical thinking, oral and written communication and applied mathematical skills
- Understand the necessity for continued education through a bachelor degree and national licensing such as the CPA or CMA

ACBSP
ACCREDITED

The Department of Business Studies is nationally accredited by the Accreditation Council for Business Schools and Programs (ACBSP). This national accreditation allows business graduates to transfer to accredited 4-year colleges throughout the country.
